Course Description: This course will teach students key Photoshop concepts and techniques utilizing the industry standard digital imaging software, Adobe Photoshop CS3. Using clear, step-by-step, project-based lessons, students will walk through the creation of a specific project, with each class building on the student's growing knowledge of the program. The information will be geared towards GUI (Graphic User Interface) specifically based on current WC3 web standards and best practices.

Statement of Prerequisites: N/A

Goal: Upon completion of the course, the Student will have a firm grasp on the software in roundtrip mode which will allow them to build standards compliant Web page graphics.

Outcome:

- The student will be able to envision, design, and create standards compliant World Wide Web graphics using the Adobe Photoshop CS3 tool set.

Methodology: Lecture, Lab, Demonstration, Online Research, Video, Critique, Hands-on Experience, etc.

Evaluation Criteria: Course assignments will be given during each preceding class based on the attending course outline.

1. The Student will be expected to fully participate in the "Hands-on" and Lecture class sessions.
